

We know you have 1000's of promotional products to sell; however, we're asking that you add a case of custom mints to every order you write. It's so easy and profitable. One case of mints is about \$89.80(Q) with a plate charge of \$60(V). Take a look at these formulas to see how you can increase your income!

**Write 5 orders per week, add one case of mints to each order = \$52.41 per order x 5 = \$262.05 per week x 52 weeks = \$13,626.60 per year**

**Write 10 orders per week, add one case of mints to each order = \$52.41 per order x 10 = \$524.10 per week x 52 weeks = \$27,253.32 per year**

**WOW! That would be a nice pay raise. And all you have to ask is,  
"May I add a case of custom mints to your order today?"**

All types of businesses use our products to promote their brand and to deliver their marketing messages; however, ten segments purchase our mints and candies more often than others.

We thought you would like to know who values our candies with customized packaging the most and uses them to effectively promote their business and marketing campaign. In addition, this group of customer has a historical re-order rate of over 70%!
